DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-47 and 51-54, drawn to a rubber dam, classified in class 433, subclass 136.
 - II. Claims 48-50, drawn to a method of assembling a rubber dam, classified in class 433, subclass 229.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make another and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product can be made by clamping the insert to the dam so that neither adhesive nor a pressure-seal has to be used.

3. Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are independent or distinct for the reasons given above and the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

5. Claims 1, 17, 21 and 48 are generic to the following disclosed patentably distinct species:

Species I: Figures 1-9;

Species II: Figures 10-16.

Further, each of Species I and II include the following distinct subspecies:

Subspecies A: the insert is elastic;

Subspecies B: the insert is malleable;

Subspecies C: the insert is resilient;

Subspecies D: the insert is rigid;

Subspecies E: the insert extends beyond the membrane.

6. The species are independent or distinct because they are mutually exclusive; the inventions as claimed are not obvious variants; and the inventions as claimed are either not capable of use together or can have a materially different design, mode of operation, function, or effect. See MPEP § 806.05(j).

7. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species and subspecies, even though this requirement is traversed. Applicant is advised that a reply to this requirement must include an identification of the species and subspecies that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims

subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

8. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

9. Applicant is advised that the reply to this requirement to be complete must include (i) an election of an invention to be examined, (ii) an election of a species and corresponding subspecies to be examined even though the requirement be traversed (37 CFR 1.143) and (iii) identification of the claims encompassing the elected invention.

10. The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

11. Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In

either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.
